No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act, or an exemption therefrom.

The foregoing list of factors is not exhaustive. These forward-looking statements are provided for illustrative purposes only and are not intended to serve as, and must not be relied on by investors as, a guarantee, an assurance, a prediction or a definitive statement of fact or probability. You should carefully consider the foregoing factors and the other risks and uncertainties described in the “Risk Factors” section of the Form S-1, the Annual Report on Form 10-K for the year ended 2021, the Quarterly Reports on Form 10-Q, the Registration Statement, the proxy statement/prospectus contained therein, and the other documents filed by the Company from time to time with the SEC. These risks and uncertainties may be amplified by the COVID-19 pandemic, which has caused significant economic uncertainty. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Intuitive Machines and the Company assume no obligation and do not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities and other applicable laws. ### Industry and Market Data

In this Presentation, Inflection Point and Intuitive Machines rely on and refer to certain information and statistics regarding the markets and industries in which Intuitive Machines competes. Such information and statistics are based on Intuitive Machines' management's estimates and/or obtained from third-party sources, including reports by market research firms and company filings. While Intuitive Machines believes such third-party information is reliable, there can be no assurance as to the accuracy or completeness of the indicated information. Neither Intuitive Machines nor Inflection Point has independently verified the accuracy or completeness of the information provided by the third-party sources.

### Trademarks

This Presentation may contain trademarks, service marks, trade names and copyrights of other companies, which are the property of their respective owners, and Inflection Point's and Intuitive Machines' use thereof does not imply an affiliation with, or endorsement by, the owners of such trademarks, service marks, trade names and copyrights. Solely for convenience, some of the trademarks, service marks, trade names and copyrights referred to in this Presentation may be listed without the TM, ® or ® symbols, but Inflection Point and Intuitive Machines will assert, to the fullest extent under applicable law, the rights of the applicable owners, if any, to these trademarks, service marks, trade names and copyrights.

### Images

This Presentation includes images and diagrams of landers, capsules, habitats, vehicles, satellites, rockets and other equipment in space, on the moon, on Mars, or in other extraterrestrial environments. Some of these images and diagrams include equipment bearing Intuitive Machines' logo. All such images and diagrams are simulated renderings for illustrative purposes only. Such images and diagrams should not be relied upon or construed by investors as an indication or assurance that landers, capsules, habitats, vehicles, satellites, rockets and other equipment developed, designed, manufactured, assembled, purchased or sold by Intuitive Machines has already, or will in the future, be placed or used in space, on the moon, on Mars, or in any other extraterrestrial environment.

### No Offer or Solicitation

No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act, or an exemption therefrom.

## DISCLAIMER (CONT'D)

### Non-GAAP Financial Measures

Certain of the financial measures included in this Presentation have not been prepared in accordance with generally accepted accounting principles ("GAAP"), and constitute "non-GAAP financial measures" as defined by the SEC. Intuitive Machines has included these non-GAAP financial measures (including on a forward-looking basis) because it believes they provide an additional tool for investors to use in evaluating the financial performance and prospectus of Intuitive Machines or any successor entity in the Proposed Business Combination. These non-GAAP financial measures should not be considered in isolation from, or as an alternative to, financial measures determined in accordance with GAAP. In addition, these non-GAAP financial measures may differ from non-GAAP financial measures with comparable names used by other companies. Note however, that to the extent forward-looking non-GAAP financial measures are provided herein, they are not reconciled to comparable forward-looking GAAP measures due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliation.

### Use of Projections

This Presentation also contains certain financial forecasts. Neither Inflection Point's nor Intuitive Machines' independent auditors have studied, reviewed, compiled or performed any procedures with respect to the projection for the purpose of their inclusion in this Presentation, and accordingly, neither of them have expressed an opinion or provided any other form of assurance with respect thereto for the purpose of this Presentation. These projections are for illustrative purposes only and should not be relied upon as being necessarily indicative of future results. Certain of the above-mentioned projected information has been provided for purposes of providing comparisons with historical data. The assumptions and estimates underlying the prospective financial information are inherently uncertain and are subject to a wide variety of significant business, economic and competitive risks and uncertainties that could cause actual results to differ materially from those contained in the prospective financial information. Projections are inherently uncertain due to a number of factors outside of Inflection Point's or Intuitive Machines' control. While all financial projections, estimates and targets are necessarily speculative, Inflection Point and Intuitive Machines believe that the preparation of prospective financial information involves increasingly higher levels of uncertainty the further out the projection, estimate or target extends from the date of preparation. Accordingly, there can be no assurance that the prospective results are indicative of future performance of the combined company after the Proposed Business Combination or that actual results will not differ materially from those presented in the prospective financial information. Inclusion of the prospective financial information in this Presentation should not be regarded as a representation by any person that the results contained in the prospective financial information will be achieved.

After the Registration Statement has been declared effective, Inflection Point will mail a copy of the definitive proxy statement/prospectus, when available, to its shareholders. The Registration Statement includes information regarding the persons who may, under the SEC rules, be deemed participants in the solicitation of proxies to the Company's shareholders in connection with the Proposed Business Combination. # THE ARTEMIS PROGRAM – AN OVERVIEW

The Artemis program is a bipartisan initiative to return humans to the Moon and eventually achieve human exploration of Mars

Unlike the Apollo program, the Artemis program is relying heavily upon partnership with the private sector in order to accomplish its goals in the most cost-effective manner possible

Total NASA spending on the Artemis program is expected to reach \$93 billion by 2025 according to a recent audit by the NASA Office of Inspector General

The program aims to conduct its first human landing in 2025 and achieve a sustainable human presence on the Moon with a powered habitable base camp by the late 2020's

Upon successful execution of the program's vision for the Moon, NASA aims to land humans on Mars sometime in the 2030's

The program is governed by the Artemis Accords, a set of international governing principles for cooperation grounded in the 1967 Outer Space Treaty and currently signed by 16 nations

The Commercial Lunar Payload Services (CLPS) program was created to deliver scientific instruments and equipment to the Moon to gather data in preparation for the human landing

## SUMMARY RISK FACTORS

*Our limited operating history makes it difficult to evaluate our future prospects and the risks and challenges we may encounter.*

*If we fail to manage our growth effectively, we may be unable to execute our business plan and our business, results of operations, and financial condition could be harmed.*

*Competition from existing or new companies could cause us to experience downward pressure on prices, fewer customer orders, reduced margins, the inability to take advantage of new business opportunities, and the loss of market share.*

*A pandemic outbreak of a novel strain of coronavirus, also known as COVID-19, has disrupted and may continue to adversely affect our business operations and our financial results.*

*Unsatisfactory safety performance of our spaceflight systems or security incidents at our facilities could have a material adverse effect on our business, financial condition and results of operation.*

*The market for commercial human spaceflight has not been established with precision. It is still emerging and may not achieve the growth potential we expect or may grow more slowly than expected.*

*Due to the inherent risks associated with commercial spaceflight, there is the possibility that any accident or catastrophe could lead to the loss of human life or a medical emergency.*

*We may experience a total loss of our technology and products and our customers' payloads if there is an accident on launch or during the journey into space, and any insurance we have may not be adequate to cover our loss.*

*Space is a harsh and unpredictable environment where our products and service offerings are exposed to a wide and unique range of environmental risks, which could adversely affect our launch vehicle and spacecraft performance.*

*The release, unplanned ignition, explosion, or improper handling of dangerous materials used in our business could disrupt our operations and adversely affect our financial results.*

*We rely on a limited number of suppliers for certain materials and supplied components. We may not be able to obtain sufficient materials or supplied components to meet our manufacturing and operating needs, or obtain such materials on favorable terms.*

*Our revenue, results of operations and reputation may be negatively impacted if our products contain defects or fail to operate in the expected manner.*

*Our business with various governmental entities is subject to the policies, priorities, regulations, mandates and funding levels of such governmental entities and may be negatively or positively impacted by any change thereto.*

*The U.S. government's budget deficit and the national debt, as well as any inability of the U.S. government to complete its budget process for any government fiscal year could have an adverse impact on our business, financial condition, results of operations and cash flows.*

*We are subject to stringent U.S. export and import control laws and regulations and U.S. economic sanctions and trade control laws and regulations*

## SUMMARY RISK FACTORS (CONT'D)

*We depend significantly on U.S. government contracts, which often are only partially funded, subject to immediate termination, and heavily regulated and audited. The termination or failure to fund, or negative audit findings for, one or more of these contracts could have an adverse impact on our business, financial condition, results of operations and cash flows.*

*Uncertain global macro-economic and political conditions could materially adversely affect our results of operations and financial condition.*

*Our business is subject to a wide variety of extensive and evolving government laws and regulations. Failure to comply with such laws and regulations could have a material adverse effect on our business.*

*Our indebtedness could expose us to risks that could adversely affect our business, financial condition and results of operations.*

*Our actual operating results may differ significantly from our guidance.*

*Our financial results may vary significantly from quarter to quarter.*

*Changes in our accounting estimates and assumptions could negatively affect our financial position and results of operations.*

*Our business is substantially dependent on contracts entered into with third parties in the ordinary course of business. As such, we are subject to counterparty risk. If a counterparty to one of our contracts were to default or otherwise fail to perform or be delayed in its performance on any of its contractual obligations to us, such default, failure to perform or delay could have a material adverse effect on our business, financial condition and results of operations.*

*If our prime contractors fail to maintain their relationships with their counterparties and fulfill their contractual obligations, our performance as a subcontractor and our ability to obtain future business could be materially and adversely impacted and our actual results could differ materially and adversely from those anticipated.*
